SUMMARY

Senior Fullstack Developer with 8+ years of experience building AI-powered platforms, healthcare compliance systems, and high-load consumer fintech products. Specialized in React, Next.js, TypeScript, Node.js, micro-frontend architecture with Feature-Sliced Design, and frontend performance optimization. Delivered measurable improvements in load times, release velocity, and product reliability across US and EU markets.

EXPERIENCE

Senior Fullstack Developer, Smartcat AI, USA – Remote

02/2024 – Present

AI-powered translation and localization platform serving 1000+ global enterprises

- Rearchitected AI-based ElevenLabs-powered Subtitle Editor from a React monolith to micro-frontends with Feature-Sliced Design and WebSocket contracts across 3 teams, cutting integration bugs by 27% and TTM by 29%.
- Implemented a semantic caching layer with RTK Query and lazy-loaded virtual scrolling for LLM-generated content, cutting redundant inference API calls by 38% and improving Largest Contentful Paint by 18%.
- Developed real-time token-usage analytics dashboards on pre-aggregated AWS S3 data, handling 120000+ time-series records per view, with retrieval latency down by 36%.
- Designed a Node.js telemetry middleware to route millions of ML inference events to Sentry for real-time analysis, with undetected production incidents reduced by 26%.
- Automated semantic versioning and release pipeline using Turborepo and Docker in GitLab CI, saving the team 18 hours per week of manual release work.

Fullstack Developer, Baxter, USA – Remote

01/2021 – 02/2024

Global medtech company with \$14.8B revenue, 50000+ employees worldwide

- Architected reusable UI Kit with Feature-Sliced Design for Medicaid and Medicare compliance forms with validation and digital signature controls, cutting TTM by 36% and manual review cycles by 71%.
- Developed document upload, parsing, and verification interfaces processing 500+ regulatory packages daily with async React state handling, with form abandonment during uploads down by 32%.
- Implemented multi-step CMS/Medicaid filing workflows with Redux Toolkit and localStorage persistence to prevent data loss across multi-screen forms, improving submission completion rate by 28%.
- Resolved 7 payment security vulnerabilities by implementing idempotent submission handling and HIPAA/GDPR-compliant validation in React, eliminating duplicate provider reimbursement incidents.
- Configured CI/CD pipelines for WordPress-based regulatory content services with automated deployments into React compliance portals via PHP and the WordPress REST API.

Frontend Developer, Rocket Bank

09/2017 – 01/2021

Digital-first neobank with mobile banking and consumer lending products

- Led the migration of the BNPL credit scoring module from legacy frontend flows to React with TypeScript, Redux, and JWT authentication, adding localStorage caching that reduced lost-input incidents by 78%.
- Migrated BNPL pages to server-side rendering with Next.js and response caching, improving Lighthouse score by 31 points and growing organic search traffic by 42%.
- Built an embeddable BNPL scoring widget via iframe with WebSocket state synchronization and cross-browser support, adopted by partner banking platforms for 100000+ loan applicants.
- Identified critical test gaps and introduced Jest unit tests and Playwright E2E suites across the credit scoring frontend, with coverage reaching 96% from 37%, and E2E practices standardized team-wide.

SKILLS

Frontend: TypeScript, JavaScript (ES6+), React, React 18+, Next.js, React Context, Redux Toolkit, Zustand, RTK Query, React Query, SWR, Module Federation, Vite, Webpack, Recharts, GraphQL, WebSockets, Socket.io, Tailwind CSS, SCSS, CSS Modules, Material UI, Ant Design, Styled Components, HTML5, CSS3, i18next, Pixel Perfect Layout, Cross-Browser Compatibility, Turborepo

Backend: Node.js, Nest.js, Express.js, REST API, GraphQL, PostgreSQL, WebSockets / Socket.io, JWT, OAuth2, Python, Django, Django REST Framework, FastAPI, Celery, PHP

Architecture & Performance: Micro-Frontends, Feature-Sliced Design, SSR, SSG, SPA, PWA, Clean Architecture, Code Splitting, Lazy Loading, Memoization, Core Web Vitals, Responsive Design, Mobile-First Design, Accessibility, WCAG 2.1 AA, OOP, SOLID, KISS, DRY

Testing: Jest, React Testing Library, Unit Testing, Integration Testing, E2E Testing, Playwright, Cypress, ESLint, Prettier, Husky

DevOps & Cloud: CI/CD, Docker, GitLab CI, Git, GitHub, GitLab, npm, yarn, AWS, GCP, Azure

Methodologies: Agile, Scrum, Kanban

AI Tools: GitHub Copilot, Codex CLI, Cursor, Claude

Languages: English – C1, Russian – native

EDUCATION

Bachelor, Business Informatics – Higher School of Economics, Russia
